Mr. COLOR GX

This paint features brighter color, higher foundation screening effect and stronger film than the former Mr. Color.
It may be mixed with the former Mr. Color and diluted with the conventional Mr. Color Thinner or Mr. Color Leveling Thinner.

NET:18mℓ

---------------------------------------	----------------------	-----------------------------------	----------------------------------	-------------------------	-------------------------	---------------------	-------------------------------	-------------------------

It provides metallic feeling when the paint surface is polished.

It has a surface like metal when the dried paint surface is polished with soft cloth, though it may be painted in the same way as the former Mr. Color.

Note that the metallic feeling becomes different if clear paint is sprayed on it.

Mr. COLOR SUPER METALLIC

NET:10mℓ

SM01 SUPER CHROME	SM02 SUPER GOLD	SM03 SUPER IRON
SM04 SUPER STAINLESS	SM05 SUPER TITANIUM	SM06 CHROME SILVER
SM07 PLATE SILVER		

SM01 - 06

The SUPER METALLIC Series is a very new metallic paint, which uses high class fine metallic particles. The base material used is the same as that for Mr. Color.

• Please use T101 - T104 Mr. Color Thinner or T106, T108 Mr. Color Leveling Thinner for paint dilution and airbrush painting.

• For airbrush painting, dilute paint with thinner to a ratio of 1 (paint) : 1 - 2 (thinner).

• For further glazing, coat the surface using Ca513 Super Clear Gloss, etc. (excluding SM06)

* Notes

• Be sure to use Leveling Thinner for SM01 and SM06 in order to utilize the characteristics of the paint.

• For SM06, be sure to apply Mr. Color, Mr. Spray black (gloss) as a base coat color before painting in order to give a metallic touch.

• In the case of SM06, clear paint can not be applied over the painted surface. (It dulls the color.)

• Metallic particles tend to settle easily, so stir well when thinning or even during painting.

• Needle airbrushes tend to clog easily with metallic particles, so do not attempt an extremely fine spray. Use an airbrush with a bore diameter of over 0.3mm.

SM07

PLATE SILVER uses ultra fine nano size particle metallic pigment and provides a very new plating type metallic finish.

• A dedicated solvent is necessary for this paint, so be sure to use only the attached dedicated thinner.

(You can not mix this paint with SM01 - 06.)

• The paint viscosity is low, so normally it is not necessary to thin it. It can also be used in an airbrush without thinning, however, if you feel the paint is too thick, add a small amount of dedicated thinner to adjust concentration.

• The results with this paint are affected by irregularities in the base.

• If the base has a mirror finish, the degree of gloss increases.

• If you rub the surface hard, the paint film will peel, so try not to touch the surface with your hands once it is painted.

• Clear paint (including water based paint) can not be applied over the painted surface. (It dulls the color.)

• The paint is highly volatile, so do not leave it for long without the lid on.

T102 Mr.COLOR THINNER 110 NET 110ml
T103 Mr.COLOR THINNER 250 NET 250ml
T104 Mr.COLOR THINNER 400 NET 400ml
T106 Mr.COLOR LEVELING THINNER NET 110ml
T108 Mr.LEVELING THINNER 400 NET 400ml

Dilute the Mr. Color with the exclusive thinner.
The standard paint-to-thinner dilution ratio is 1:1.5 to 2 for painting with an air brush.
Use the Leveling Thinner for painting with an air brush. (It is also available for brush painting.)
It improves the paint flatness and provides glossier surface, since it contains retarder.
It also provides even mat surface when used for mat paint.

※FOR AQUEOUS COLOR

T110 AQUEOUS COLOR THINNER 110 NET 110ml
T111 AQUEOUS COLOR THINNER 400 NET 400ml

This thinner contains alcohol for faster drying, though the Aqueous Hobby Color may be diluted with tap water.
It also improves adhesion to the paint surface.

These are standard primers. The primers with larger numbers have finer particles.
Use the primer to amend small flaws before painting.
The Base White is a white primer with high screening effect. It enhances coloring of finish paint.

RP261 Mr.RESIN PRIMER NET 40ml
MP242 Mr.METAL PRIMER NET 40ml

B517 Mr.RESIN PRIMER NET 180ml
B518 Mr.BASE WHITE 1000 NET 180ml

The Resin Primer is exclusive for resin cast models.
It cannot be painted on plastic models.
The Metal Primer is to be coated on metallic materials such as white metal and etching parts (brass and stainless steel) before painting. It prevents separation of paint.

B501 Mr.TOPCOAT GLOSS NET 86ml
B502 Mr.TOPCOAT SEMI-GLOSS NET 86ml
B503 Mr.TOPCOAT FLAT NET 86ml

The Top Coat is a coating material for surface finish.
Use it for final finish of painted models.
It is water-based and may be painted over both the Mr. Color and Aqueous Hobby Color.
It may also be painted on the slide marks.
* The B503 Flat may become white if it is painted thick. Spray it thinly. Do not use it in a moist day.

B513 Mr.SUPER CLEAR GLOSS NET 170ml

- WEIGHT 2.9kg

PS307

Mr. LINEAR COMPRESSOR L7 / REGULATOR SET

A set of Mr. LINEAR COMPRESSOR L7, Mr. AIR REGULATOR and Mr. STAND & TRAY SET II.

PS308

Mr. LINEAR COMPRESSOR L7 / AIR BRUSH SET

A full set of Mr. LINEAR COMPRESSOR L7 with airbrush PS264 Mr. PROCON BOY WA 0.3mm.

PS253

Mr. AIR REGULATOR w / STAND

An essential item for airbrush painting equipped with decompression, draining, and branching functions.

PS259

Mr. AIR REGULATOR III

An installation-type regulator mounted on Mr. STAND. This regulator can be used not only for L5 and L10 but also for other low-pressure compressors.

PS282

DRAIN & DUST CATCHER

Even When using a regulator, water droplets can still collect on the inside of hoses during the humid rainy season. Connect this to your airbrush as an additional second defense against water droplets.

PS288

DRAIN & DUST CATCHER II

Attached this combination hand-grip and airfilter to your airbrush gets you better results by enabling you to regulate air flow by hand.

PS-171 Mr.AIRBRUSH NL3 NEEDLELESS SINGLE ACTION TYPE

SINGLE ACTION TYPE 0.3mm nozzle

The NL3 has an internal mechanism that adjust the paint spray without using a needle, and it is able to deliver a comparable spray to needle type models.

PS-265 Mr.PROCON BOY SAe SINGLE ACTION TYPE

SINGLE ACTION TYPE 0.3mm nozzle

An airbrush with dial for easy spray adjustment by one thumb. This airbrush has a 1/8 (S) mouth with joint for PS (fine).

PS-267 Mr.PROCON BOY FWA DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.2mm nozzle

An ultrahigh-precision airbrush featuring a 0.2 mm nozzle diameter. This airbrush delivers great performance for ink-spot dazzle and fine-gradation painting. This is the first small-diameter model with 10-cc cup. This airbrush has a 1/8 (S) mouth with joint for PS (fine).

PS-269 Mr.PROCON BOY WA PLATINUM DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.3mm nozzle

While this needless to say includes the much talked about air adjustment system, we have a installed for the first time a semi-easy soft button feature for smooth spraying. The inner section uses a teflon needle sealing to improve durability. Features a 10cc direct-mount cup and a universal 0.3mm nozzle. PS hose and air valve are included.

PS-275 Mr.PROCON BOY LWA TRIGGER TYPE DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.3mm nozzle

The hand operated trigger operation keeps fingers from getting fatigued, greatly improving the results of painting done on broad surfaces and for long periods of time.

PS-290 Mr.PROCON BOY LWA TRIGGER TYPE DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.5mm nozzle

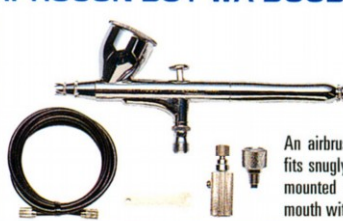

A trigger type airbrush great for use on big surfaces. The hand operated trigger operation keeps fingers from getting fatigued, greatly improving the results of painting done on broad surfaces and for long periods of time. For even more flexible airbrushing, you can switch between two types of nozzle caps with different tip size depending on whether you want a normal or wide spray pattern.

The spraying pattern can be changed with two kinds of air caps.

PS-264 Mr.PROCON BOY WA DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.3mm nozzle

An airbrush with holder for easy carrying that fits snugly in your hand. The 10-cc paint cup is mounted directly. This airbrush has a 1/8 (S) mouth with joint for PS (fine).

PS-266 Mr.PROCON BOY LWA DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.5mm nozzle

The perfect airbrush for spraying a metal color or surface layer over a large area. This airbrush provides stable spraying even under low pressure. The 15-cc large cut of the direct-mount type makes it easy to wash. This airbrush has a 1/8 (S) mouth with joint for PS (fine).

PS-268 Mr.PROCON BOY SQ SINGLE ACTION TYPE

SINGLE ACTION TYPE 0.4mm nozzle

This airbrush has all the standard requirements for an airbrush for beginners at an amazingly low price. Paint spray thinness is easily adjusted with the dial on the back of the unit. This airbrush has a 1/8(S) mouth with joint for PS(fine).

PS-270 Mr.PROCON BOY FWA PLATINUM 0.2 DOUBLE ACTION TYPE

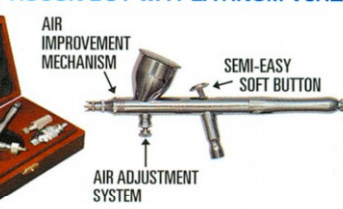

DOUBLE ACTION TYPE 0.2mm nozzle

* Air adjustment system
The spray can be easily adjusted for metallic colors, quick drying paint, and other paint characteristics by simply controlling only airflow - no pressure adjustment is needed.
* Semi-easy soft button
Push down the button to adjust the fineness of the needle without paint squirting out when pulling the button. This enables smooth spraying whenever you pull the button.

PS-289W Mr.PROCON BOY WA PLATINUM Ver.2 DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.3mm nozzle

* Air improvement mechanism
It regulates air flow so that stable operation is enabled even at a low air pressure.

PS-296 Mr.AIRBRUSH GMW4 DOUBLE ACTION TYPE

DOUBLE ACTION TYPE 0.3mm nozzle

This is a high-end version intake-type airbrush with an ultra-standard 0.3mm aperture. While the bottle is the same as past versions and can use Mr. Color 18mm containers, it's most special feature is that the entire base for attaching the bottle can be removed.
