THE GERBER COUNCIL FOR THE PROMOTION OF SELF-RELIANCE

MAGNUM L.S.T.®

Light. Strong. Tough. Based on the success of our original line of L.S.T. pocket knives we rolled out the Magnum — same lightweight design, same sturdy lockback mechanism, but larger than its predecessors and with finger grip placements in its checkered handle for a can't-miss grip.

Tools

If you can't get it done
with a multi-tool,
you're doing it wrong.

Shown: Grappler™

To use a multi-tool, is by its very definition, to improvise—to innovate. This year, in the grand tradition of innovation, we raise the bar yet again. One-hand opening, locking multi-plier? Component-rich tools that carry more like lightweight pocket knives? Check, and Check.

ONE-HANDED OPENING TOOLS

With the simple flick of your wrist, the pliers snap into place, ready for action. This patented technology is the cornerstone of many of our most popular tools.

GRAPPLER™

- WRIST-FLICK PLIERS DEPLOYMENT
- FULLY LOCKING COMPONENTS
- STAINLESS STEEL CONSTRUCTION

BUTTERFLY OPENING TOOLS

These high-performance tools blend ergonomics, style and durability with spring action handles, external one-handed component access and comfortable contoured grip areas.

STRATA™

- SPRING ACTION HANDLES
- EXTERNAL COMPONENT ACCESS
- FULLY LOCKING COMPONENTS

KEYCHAIN TOOLS

Gerber quality, form and function in pint-sized packages. The folding tools feature anodized aluminum spring action handles and are available with either pliers (Vise) or scissors (Splice). The Curve™, our smallest keychain tool yet, features essential implements in a super compact size.

CURVE™

VISE™

- FOLDING TOOLS FEATURE SPRING ACTION HANDLES AND ARE AVAILABLE WITH EITHER PLIER JAW OR SCISSOR
- CURVE OFFERS A VERSION THAT CAN BE ENGRAVED

OUTBOARD TOOLS

Outboard tools allow users to access blades and tool components without having to fully open the Multi-Plier®. Larger blades and tools typically include thumbstuds for convenient one-handed opening.

- TOOLS ACCESSIBLE ON OUTSIDE OF HANDLES
- ONE-HANDED OPENING COMPONENTS

TUNGSTEN CARBIDE WIRE CUTTERS

Select Multi-Pliers® include our replaceable tungsten carbide wire cutter inserts. These durable wire cutters can take a great deal more stress and abuse than standard multi-tool wire cutters and on some models can be replaced when they wear out.

- CARBIDE INSERTS HAVE THREE SIDES TO USE BEFORE YOU'LL EVER NEED TO REPLACE THEM

V-CUT WIRE CUTTERS

"Pinch-style" cutter action offers a stronger/cleaner cut than the traditional "bypass-style" cutters used on most multi-tools.

- THE PLIER DESIGN ALLOWS FOR A MUCH MORE PRECISE WIRE CUT

SAF.T.PLUS™ LOCKING SYSTEMS

Our patented Saf.T.Plus™ locking system is the safest, strongest blade and tool lock on the market. Tools automatically lock when fully opened, and will not close again until the sliding lock-release is pulled back.

- MOST OF OUR FULL SIZED TOOLS FEATURE THE SAF.T.PLUS™ LOCKING SYSTEM
- BLADES AND TOOLS ARE RELEASED WITH THE SLIDE OF A BUTTON

ANTI-ROTATION

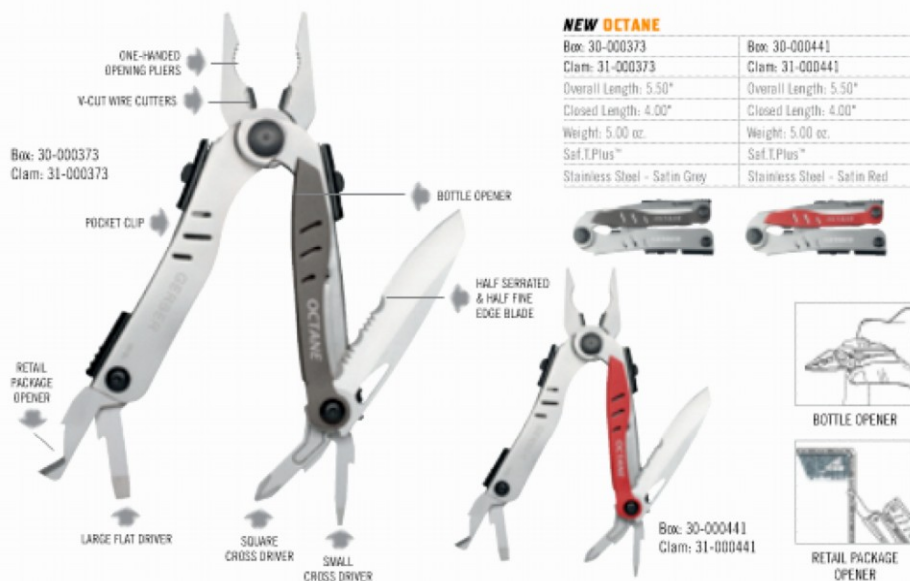

All full-sized Multi-Pliers® feature our patented Anti-Rotation technology, allowing the user to access each blade or tool independently.

- PULL OUT THE IMPLEMENT OR BLADE YOU WANT WITHOUT OTHERS COMING ALONG WITH IT

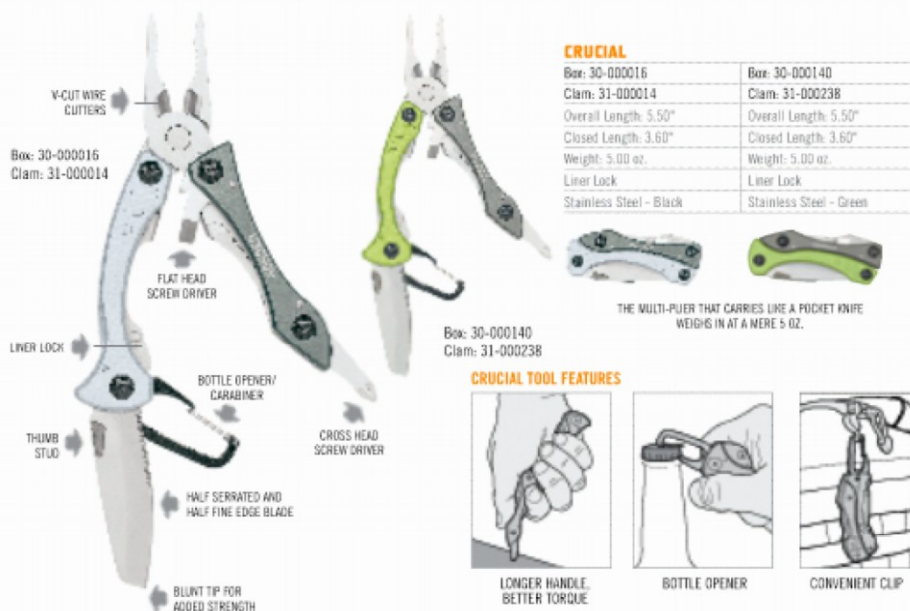

NEW OCTANE™

Our patented one-handed opening design makes the Octane a quick starter, while the sleek form and function ensure it's a top performer. It's light enough to carry in your pocket but surprising enough to reveal a multitude of 8 additional components in addition to the sturdy pliers.

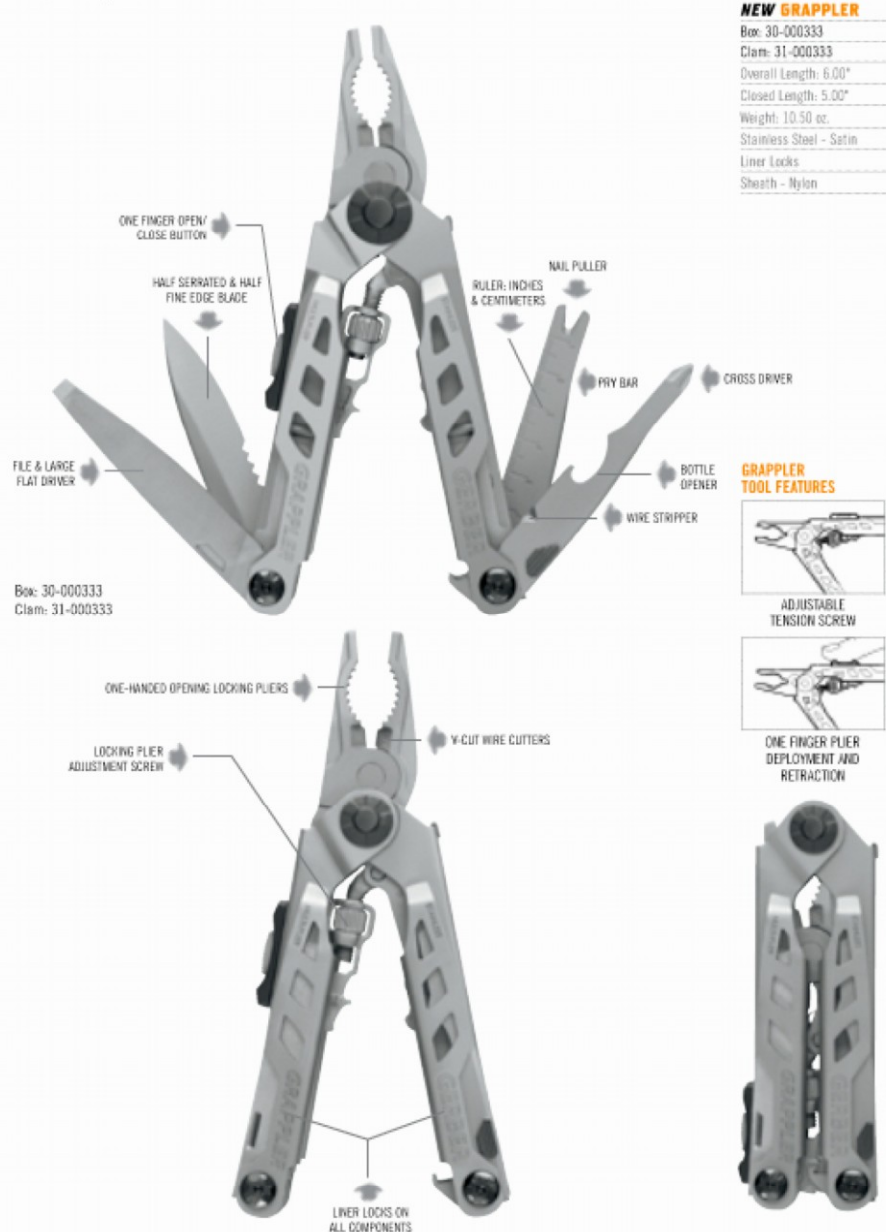

CRUCIAL™

As stylish as your favorite knife, but packed with essential tools like your favorite Gerber Multi-Plier®. Despite its compact, lightweight size, the Crucial tool delivers big, full-function components.

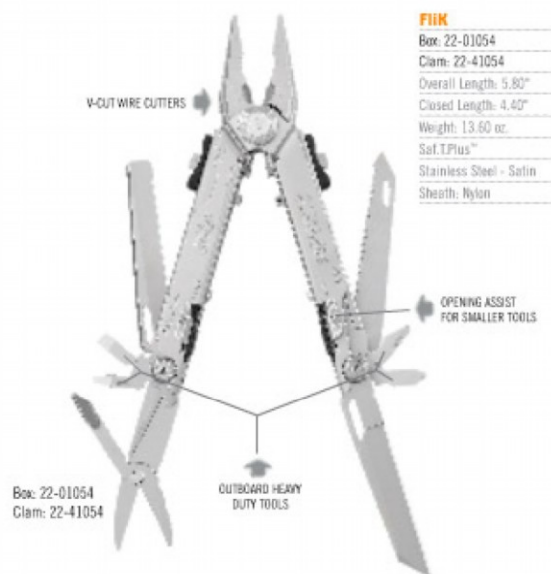

NEW GRAPPLER™

The Grappler is one of those engineering feats that makes even us step back and marvel. This locking plier snaps into ready-pos ition with just one-hand and locks down for a tight bite on any screw 5/8" or smaller. With 13 outboard components including a sturdy-size d knife blade, the Grappler is sure to be a Gerber classic.

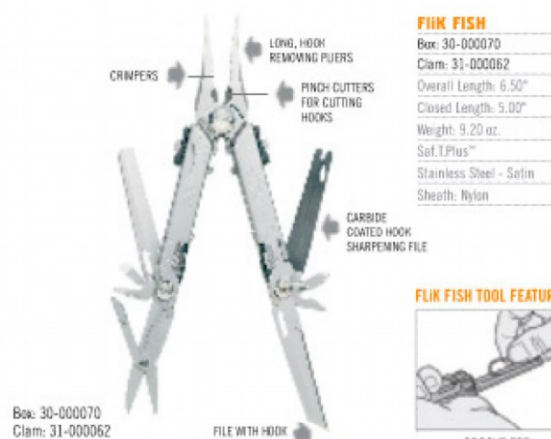

FLIK

For those looking for superb multi-tool innovation from Gerber, we offer the Flik. The Flik is a handy tool that delivers industrial strength and professional grade functionality within a compact design meant for every day use. The Flik combines one-handed deployment of pliers with outboard tools including a saw. Our patented Saf.T.Plus™ locking system assures tool components stay in place while in use and an opening assist mechanism makes it easy to access smaller tools.

FLIK FISH

When you've landed the big one, fumbling for tools isn't easy. Enter the Flik Fishing tool. With a flick-of-the-wrist, the long needlenose pliers deploy quickly, keeping one hand free for more important tasks. Remove hooks in a snap or sharpen them with the included file. This tool is packed with implements like flip-out scissors able to cut 150# line, which means you can leave all those other toys back in that clunky tackle box.

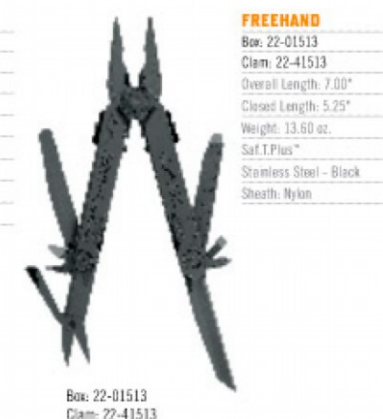

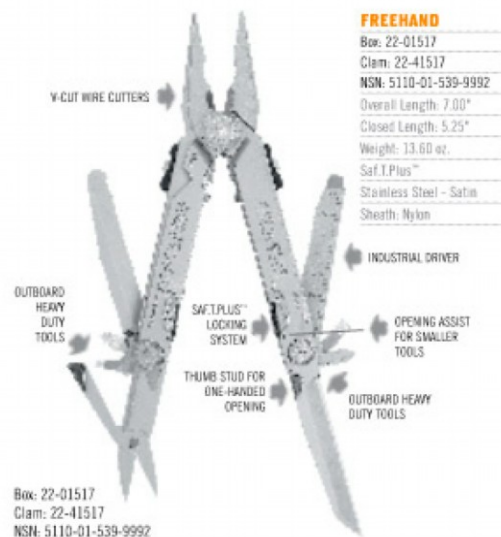

FLIK FISH TOOL FEATURES

FREEHAND

Our largest industrial multi-tool, the Freehand combines the functionality of our one-handed opening pliers with the convenience of outboard tools, including a thick, industrial driver.

FLIK & FREEHAND TOOL FEATURES

TOOL KITS

Add to the functionality of your Multi-Plier® by using this add-on tool kit. Contains an adapter, three different sizes of flathead bits, cross point bits and hex head bits.

TOOL KIT

Flik™ Fish, Flik™, Freehand™, Diesel™, Radius™, Method™, Suspension™, Ripstop™, and Evo™

3 Flat Drivers: 1/8", 3/16", 9/32"

3 Phillips Drivers:

- Size 1 = Small
- Size 2 = Medium
- Size 3 = Large

3 Hexbits: 3mm, 4 mm, 6 mm

TOOL KIT

MP 400, MP 600 and MP 800

3 Flat Drivers: 1/8", 3/16", 9/32"

3 Phillips Drivers:

- Size 1 = Small
- Size 2 = Medium
- Size 3 = Large

3 Hexbits: 3mm, 4 mm, 6 mm

DIESEL

For those who need a stronger tool for those tougher, nastier jobs we have the Diesel. A durable, industrial-strength multi-tool with wrist-flick deployment and larger than average tool components. Our Saf.T.Plus™ locking system keeps tools in place for maximum safety and security.

MULTI-PLIER® 600 BASIC WITH TUNGSTEN CARBIDE INSERTS

Thanks to feedback we received from our men and women in uniform, we toughened up our Multi-Plier 600s by adding our patented replaceable tungsten carbide wire cutters to this already popular tool. When the cutters become dull or misshapen simply rotate the tungsten carbide cutters 120-degrees, and you've got yourself a good-as-new cutter. After three rotations, the entire cutter can be replaced.

MULTI-PLIER® 600 MAINTENANCE KIT

Perfect for Do-It-Yourselfers, the Multi-Plier 600 maintenance kit pairs a needlenose Multi-Plier 600 stainless multi-tool with carbide insert cutters and a premium replaceable RemGrit® blade with our Firecracker™ flashlight. The Firecracker is a rugged light that will give you seven hours of run time when powered by a single AA battery and a longer distance beam and increased spot brightness versus other lights in its class.

Box: 07570
NSN: 5110-01-462-3402

CARBIDE CUTTER INSERT REPLACEMENTS

Replacements fit the following Multi-Pliers:

*MP 600 Basic (select models only)
*Legend™

Clam: 48252

EVO™ TOOL

Time and again Gerber manages to push the bar for innovation in the multi-tool category — the EVO Tool is no exception. Based on knife counterparts, it exudes style and features all outboard components, meaning there's no need to open handles to access tools. Each component is locking, making these tools among the safest out there. Spring-loaded handles reduce user fatigue during extended use.

Box: 22-01771
Clam: 22-41771

EVO TOOL

Box: 22-01771

Sheath: Nylon

WISE® & SPLICE®

It's a bottle opener with about nine other tools. At least, that's one way to look at it! These pocket-sized pliers pack multiple functions into a tiny package that fits on a keychain. Nip it, clip it or snip it with the Splice scissors. Like the Vise, the Splice gives you more than cutting capabilities thanks to a variety of handy tools.

Box: 30-000017
Clam: 31-000021
