THE SUREFIRE DIFFERENCE

WE BUILD THE BEST... BECAUSE WE BUILD FOR THE BEST.

You're a cop. You're different. You run towards the sound of gunfire—into harm's way, for the sake of others. Much of your work goes on in the darkness, so light is your ally and SureFire is your partner—bringing you the finest illumination tools in the world.

SureFire has led the way in building high-end illumination tools for law enforcement ever since supplying L.A.P.D. SWAT with weapon-mounted lasers for the '84 Los Angeles Olympics. SureFire has worked hand-in-hand with the best, most experienced officers to design and build powerful, compact, tactically correct illumination tools for cops.

SureFire's commitment to advanced technology, the finest materials, and its no-compromise philosophy has led to the creation of illumination tools that are unmatched in light output, beam quality, and toughness. SureFire lights give you the advantage you need when you go in harm's way. It's no coincidence that SureFire lights are used by more SWAT teams than any other brand.

WHAT MAKES SUREFIRE DIFFERENT...

- Superior light emitting diodes (LEDs) provide massive light output and longer runtimes with no filament to burn out or break
- Lightweight yet rugged bodies are virtually indestructible
- Precision reflectors or TIR lenses create flawless beams
- Patented tailcap switches are simple to operate in high-stress situations as well as being tactically correct
- Digital power regulation maximizes light output and useful runtime
- O-rings seal out moisture, dust, and dirt
- 123A lithium batteries provide unmatched power in all weather conditions, a long shelf-life, and built-in fault protection

THE WORLD'S FINEST ILLUMINATION TOOLS®

WHEN YOU LEAVE YOUR VEHICLE... WHAT YOU GOT IS WHAT YOU GOT.

ONE IS NONE, TWO IS ONE—BUT THREE IS KEY.

Anytime you're out of your vehicle, gear-wise, you're on your own. It may be high noon, but it's darker than midnight inside that warehouse you're about to enter. Got your light with you, or is it charging back in your cruiser? What if you have your light, but it goes out? Got a back up, or an extra set of batteries? Can you use your light effectively with your pistol drawn? Does your weapon have an integrated light you can count on too? We pose these "what if" questions to ourselves every day.

As you know, unpredictable things happen in high-stress situations, and it just makes sense to be ready for whatever comes your way. Given the importance of light in identifying and isolating threats, and how it relates to your overall effectiveness in the field, the solution is to always carry three lights: a primary, a backup, and a weapon-mounted light. This is the core of the SureFire Law Enforcement Tactical Trinity™—the most complete illumination system ever developed to ensure your safety out in the field.

“A BRIGHT, TACTICALLY CORRECT LIGHT IS CRUCIAL IN LOW-LIGHT ENVIRONMENTS, PLUS IT OFFERS A HUGE, POTENTIALLY LIFE-SAVING TACTICAL ADVANTAGE: BLINDING AND DISORIENTING AN OPPONENT.” –Paul Michel, The FBI Law Enforcement Bulletin

THE RIGHT LIGHT IS CRITICAL

Do you carry around a flashlight or an illumination tool? Do your lights give you a flawless, pure beam of light, or dark spots and rings? Are your lights small enough to carry with you at all times yet powerful enough to temporarily disorient an adversary? Are they reliable in all situations? Do they fit with your department's tactical requirements? These are questions we ask ourselves every day. From routine administrative tasks to high-risk situations, your lights are essential tools—perhaps as important as your pistol. Do you carry the best lights? Do you carry a SureFire illumination tool?

CONTROL THE DARKNESS

Using the best illumination tools is vital to your success, but it's important to master your lights as well. Using proper low-light tactics (like those taught at the SureFire Institute®*) allows you to move through the darkness with minimal detection and control your adversary's ability to see you—and anything else for that matter. The brilliant, pure beam of a SureFire light not only lights up the dark, but it's also a valuable force option, causing confusion and often reducing the aggressiveness of a subject. Blinding light gives you a tactical advantage by identifying your opponent while denying him the ability to see.

And when the use of deadly force is necessary—departmental policies require positive threat identification as well as threat isolation. Light is absolutely crucial in these situations when you must positively identify potential threats and place accurate shots in low-light situations. You don't have the luxury of time when decisions are made in split seconds. Which lights do you want to count on?

SureFire Institute is a registered service mark of SureFire® LLC. C&W Murphy and Associates licenses the SureFire Institute name and exclusively uses SureFire products, but is not a subsidiary or affiliated in any manner with SureFire, LLC.

ETHING TO THINK ABOUT

“ IN 70% OF SHOOTINGS, OFFICERS WERE OPERATING IN (LOW) LIGHT CONDITIONS THAT EQUATE WITH THEM BEING CLOSE TO LEGALLY BLIND. ”

— Dr. Bill Lewinsky, Force Science Research Center at Minnesota State University

“ OVER 70% OF ALL OFFICER-INVOLVED SHOOTINGS TAKE PLACE IN A LOW-LIGHT ENVIRONMENT, YET MOST TRAINING TAKES PLACE UNDER NORMAL LIGHTING CONDITIONS. EVEN DAY-SHIFT OFFICERS REGULARLY OPERATE IN LOW-LIGHT CONDITIONS WHEN SEARCHING UNLIT STRUCTURES, BASEMENTS, CLOSETS AND TUNNELS. ”

— Bill Murphy, Police Officer and Lead Instructor at SureFire Institute

LAW ENFORCEMENT

➤ You need serious light to do your job—we all know the stakes couldn't be higher. At SureFire we believe that having three illumination tools at your side is absolutely vital to your safety. That's what we've learned from being alongside law enforcement for three decades now. That's why we developed the SureFire Tactical Trinity for Law Enforcement.

SureFire's compact, powerful, and virtually indestructible lights are perfectly designed for cops. Our new G3™ LED Holster Kit, E1B Backup™, and X300® WeaponLight provide you with a tactically sound lighting solution designed to give you the best illumination tools you need, right now, when split seconds count.

We call it the Tactical Trinity—and we know it will help you succeed in the field.

1

PRIMARY LIGHT

One is none. You need to start with one powerful light that's small enough to always carry with you and easy to access no matter where you are, or what you're doing. You should have your light holstered, just like your handgun, with extra batteries right there in the holster—ready when you need them. It should provide tactical-level light (over 50 lumens for an LED) to enable you to disorient or temporarily blind the night-adapted vision of an aggressor.

2

BACKUP LIGHT

Two is one. What do you do if your primary light fails or is lost? You need a backup light. It must be compact, since room on your duty belt (or under your suit jacket) is limited, but it has to be bright enough to blind or disorient, or what good is it? It should also use the same batteries as your primary light so spares are always handy. We need to keep it simple because you have much bigger things on your plate. A backup light should be a long-running, tactical-level light that is always around as well as being as tough as your primary light, even if it's a bit smaller. And it's perfect for off-duty use too, because you're always a cop, and failure is not an option.

3

WEAPONLIGHT

Three is KEY. You need a weapon-mounted light because, when your weapon is drawn, we all know what's on the line. A SureFire WeaponLight will help you identify the threat—or see that there is no threat at all. You need a powerful, lightweight, and shockproof WeaponLight that mounts easily to your pistol (shotgun or rifle, we've got you covered there too) and is always ready to go. Lights with lasers are available too, but on that front, you make the call. Handheld lights are indispensable, but any gunfighter will tell you, sometimes it's best to keep both hands on your gun.

YOUR WORK IS NOT AS SIMPLE AS 1-2-3 BUT THE SUREFIRE TACTICAL TRINITY SYSTEM REALLY IS.

NT TACTICAL TRINITY™

1 PRIMARY LIGHT & HOLSTER

- A powerful tactical-level light* that's long-running, virtually indestructible, and sits in a holster so it's always available when needed. Must be suited to be paired with a pistol.

RECOMMENDED:

G3™ LED KIT or Z2® LED KIT p.6-7

LAW ENFORCEMENT TACTICAL TRINITY™

2 BACKUP LIGHT

- A powerful tactical-level light*, just like your primary light, but more compact so it can be easily placed in a pocket or on a duty belt but accessed quickly when needed. A two-stage light can provide officers with general-use light with extended runtime.

RECOMMENDED:

E1B BACKUP™ p.8

3 WEAPONLIGHT

- Weapon-mounted tactical-level lights* are available for pistols, shotguns, and rifles. When weapons are drawn in low-light, there is nothing more vital than seeing what's in front of you in these high-stakes situations.

RECOMMENDED:

X300® or X400™ p.9

* A tactical-level LED flashlight should emit at least 50 lumens of light because that's typically enough light to temporarily disorient or blind the night-adapted vision of an opponent.

1 PRIMARY LIGHT

G3™ LED HOLSTER KIT

In high-stress situations, where split seconds count, getting your light quickly paired with your pistol can mean the difference between life and death. We understand this. That's why the G3 LED Holster Kit was designed to fit in with law enforcement training to allow you to deploy your primary light quickly and safely—both with and without a handgun. This holster and light combination was primarily designed to be oriented near your midsection where you are trained to position your weak-hand when drawing your pistol. See diagrams below for various methods that work with this tactical holster.

The holster itself is lightweight yet rugged and created for daily use. It securely fastens onto your duty belt and was designed to accommodate both right and left-handed shooters. The holster also securely holds the G3 LED bezel-down, so it's tactically correct and always ready to be drawn and deployed in one continuous motion. The holster features an integrated battery compartment too; it securely holds three extra 123A lithium batteries to provide you with over 18 hours of light in the field—far greater runtime than a typical rechargeable flashlight.

Maybe the most revolutionary aspect of the new G3 LED Holster Kit is that the holster can be angled to perfectly mesh with your drawing style and maximize your speed on the draw. And, of course, the G3 LED Holster Kit comes standard with the SureFire G3 LED light, which provides tactical-level light for 5.8 hours, with useful light for a total of 9.4 hours. An aluminum bezel fits perfectly into the holster, while the Nitrolon® body resists corrosion and helps you maintain a firm grip in all conditions. And the patented SureFire tailcap switch ensures that you'll have light when and where you need it. Press for momentary-on and twist for constant-on—it's always easy to find the switch, even in high-stress situations. This tactical holster also accommodates other 1.25" bezel SureFire lights listed on the next page.

order at: www.surefire.com/g3holsterkit

➤ USING TACTICAL-LEVEL LIGHT WITH PROPER TACTICS AND MOVEMENT IS VITAL TO YOUR SUCCESS. IF YOUR LIGHT IS DEPLOYED WITHOUT MOVEMENT AND MOMENTARY BURSTS OF LIGHT THEN YOU MAY BE GIVING YOUR ADVERSARY AN EASIER SHOT. TACTICAL MOVEMENT IS CRUCIAL AND TRAINING SHOULD BE SOUGHT AT INSTITUTIONS LIKE THE SUREFIRE INSTITUTE, LOCATED IN SOUTHERN CALIFORNIA. LISTED HEREIN ARE THE FOUR MOST COMMON METHODS FOR PAIRING A PISTOL WITH A LIGHT. THEY ALL HAVE THEIR STRENGTHS AND YOU SHOULD TRAIN TO BE ABLE TO TRANSITION BETWEEN THEM AS CIRCUMSTANCES DICTATE. THESE PHOTOS ARE FOR ILLUSTRATIVE PURPOSES ONLY—ALWAYS SEEK PROFESSIONAL TRAINING.

THE ULTIMATE PRIMARY LIGHT & HOLSTER COMBINATION*

The new Z2® LED, the heart and soul of this premium holster kit, is a high-intensity LED flashlight with an ergonomic aerospace-grade aluminum body featuring the SureFire CombatGrip™ which allows for syringe-style operation, making it ideal for pairing with a pistol. The Z2 LED features a virtually indestructible, electronically regulated light emitting diode (LED) that generates 80 lumens of tactical-level light in a beam with no dark holes or rings; more than enough light to temporarily disorient the night-adapted vision of an opponent. The Z2 LED features a patented tactical tailcap switch with push momentary-on and twist constant-on that's vital for a serious primary light. It is O-ring sealed, features a coated Pyrex® window, and comes with a lanyard designed to make changing mags on your pistol easier while holding your light. It truly is the ultimate primary light and holster combination around.

* SureFire's continuous innovation means there will always be something better coming down the pike.

order at: www.surefire.com/z2holsterkit

Holds three extra batteries; two to keep your Z2 LED running strong, and one for your Backup.

LAW ENFORCEMENT
TACTICAL TRINITY

2

BACKUP LIGHT

BACKUP™

DUAL-OUTPUT EXTENDED-RUNTIME LED FLASHLIGHT

The compact and powerful E1B Backup was designed as an ideal backup light that can easily be carried every day by undercover officers and beat cops alike—and it's four-times brighter than a typical D-cell flashlight. With a length of only four inches and a weight of under 3 ounces, the Backup doesn't take up much space in a pocket. Its dual-output LED delivers two useful light levels, so it might become more than just a backup light to you. It starts with 80 lumens of blinding light on high and follows (with another click off and on) with 5 lumens of light at its low setting—still plenty of light to check an ID or write a citation. The efficient Backup delivers useful light levels for an impressive 37 hours on one 123A lithium battery. Its hard-anodized aluminum body features melted styling, which goes easy on clothing, and its sturdy, two-way pocket clip allows the light to be carried bezel up or down. Its tailcap switch can be pressed for momentary-on and clicked for constant-on—but it always leads with the high-output setting so tactical-level light is just a click away in high-stress situations. It's a must-have for any police officer.

order at: www.surefire.com/backup

3

WEAPONLIGHT

X300[®] LED WEAPONLIGHT

The SureFire X300 WeaponLight features 110 lumens of light output to reach deep into the darkness to identify a threat, or to temporarily blind or disorient an aggressor. Its TIR lens produces a tight center beam but it also offers significant surround beam to accommodate peripheral vision to help avoid any sudden surprises. Packed in a waterproof, hard-anodized aerospace-grade aluminum body, the X300's virtually indestructible LED has no filament to burn out, and there's nothing to break from the effects of recoil. A tempered Pyrex[®] window protects the TIR lens and maximizes light output while O-rings seal out dust, dirt, and moisture.

The X300 also features ambidextrous switching, which makes it easy to operate the light with either hand—and remote switching options are available to provide precise control of virtually any weapon. The X300 fits both Universal and Picatinny rails with many other SureFire adapter mounts available. It's the perfect weapon-mounted light for your pistol and your long gun as well. When your weapon is drawn, make sure that you have the right light for the battle at hand.

order at: www.surefire.com/X300

NEW

X400[™] LED WEAPONLIGHT

The SureFire X400 is a rugged LED WeaponLight with all the features of the X300 plus one more: a powerful, fully integrated red laser sight. Its versatile beam and highly visible laser make it an excellent choice for both close and longer-range applications.

order at: www.surefire.com/X400

OG SWITCH

Ambidextrous pressure-activated grip switch for use on pistols

XT SWITCH

Remote switch attaches to Picatinny rail for use on long guns

WEAPONLIGHTS AVAILABLE AT SAFARILAND.COM

➤ ADVANCED LIGHTING & TACTICAL SYSTEMS

The SureFire Law Enforcement Tactical Trinity is, at its core, as simple as 1-2-3, but sometimes life on the streets gets a lot more complicated. That's why this Law Enforcement Systems Guide expands on the core tools we've earlier outlined. Are you tactical? Then you may need sound suppression for close-quarter combat. Suppressors can help protect your hearing without impeding accuracy or adding much weight to your long gun. Or how about a dedicated forend with a piercing light always onboard your shotgun? Edged weapons, infrared lights, and a pen that does more than write, are just a few things that can give you the edge you need out on the streets.

You need to do what works for the unique aspects of your job—because there might not be a second chance to get it right. The SureFire Tactical Trinity is the starting point, a core set of principles, but at SureFire we can meet your needs no matter what they are. Read on to see what else you can add to your arsenal.

RIFLE, CARBINE & SUBMACHINE GUN WEAPONLIGHTS

A WEAPONLIGHT ON EVERY WEAPON YOU USE IS A VITAL ASPECT TO THE SUREFIRE TACTICAL TRINITY SYSTEM. SUREFIRE MAKES A VARIETY OF TOUGH, COMBAT-TESTED WEAPON-MOUNTED LIGHTS THAT ATTACH TO YOUR RIFLE, CARBINE, OR SUBMACHINE GUN.

SHOTGUN FOREND WEAPONLIGHTS

SureFire makes dedicated shotgun forend WeaponLights for many popular shotguns. These powerful, rugged, ergonomic lights replace the firearm's original forend and are available with recoil-proof LED heads or shock-isolated incandescent lamp assemblies that provide IR light, if needed. All models feature tactical switching with momentary-on and constant-on switching, and most feature a system-disable switch to prevent accidental activation during transport or covert operations.

DEDICATED FOREND WEAPONLIGHTS FOR THE M4 / M16 / AR-15 / MP5

When you don't have a Picatinny rail forend but need powerful, reliable weapon-mounted illumination, a SureFire Dedicated Forend WeaponLight is ideal. These battle-tested WeaponLights are dedicated to specific firearm models and replace the original forend. They are available with LED or incandescent heads for IR applications, feature brilliant light and rugged construction, along with integrated ergonomic switching vital for tactical applications.

SCOUT LIGHT® WEAPONLIGHT

The Scout Light is compact and lightweight but puts out a brilliant beam that makes it ideal for close-quarter and longer-range operations where equipment and weight must be kept to a minimum. The Scout Light attaches to a Picatinny rail in seconds, and its electronically regulated LED kicks out 120 lumens of blinding, tactical-level light. Whatever your weapon of choice, SureFire has what you need.

(SWAT) VERTICAL FOREGRIP WEAPONLIGHTS

For superb ergonomics and increased weapon control, nothing beats a SureFire Vertical Foregrip WeaponLight. These ergonomic lights attach directly to your weapon's Picatinny rail by way of an integral throw-lever or dual-thumbscrew clamp. Most feature super-efficient LED assemblies that are virtually immune to failure from shock or recoil and provide more hours of tactical-level light from a set of batteries. Shock-isolated incandescent lamps are also available for missions that may require IR light. And SureFire Vertical Foregrips feature low-output LED navigation lights available in night-vision-friendly colors.

order at: www.surefire.com/weaponlights

SUREFIRE® HELMET LIGHTS

SureFire Helmet Lights provide low-profile, hands-free illumination perfect for navigation, loading gear, equipment repair, and nearly any close-quarter tactical illumination needs. Available in multiple night-vision-friendly colors, including infrared for use with night vision devices.

order at: www.surefire.com/helmetlights

(M1 Illuminator shown)

INFRARED (IR) LIGHTS

Infrared lighting, invisible to the naked eye, is a powerful asset when combined with night vision devices. SureFire makes a dedicated infrared handheld LED light (M1 Illuminator), a handheld with secondary infrared LEDs (Kroma® Mil-Spec), Helmet Lights featuring IR LEDs, and WeaponLights with integral infrared navigation lights. We also make IR filters for every incandescent and HID we make since white-light LEDs do not produce adequate infrared radiation.

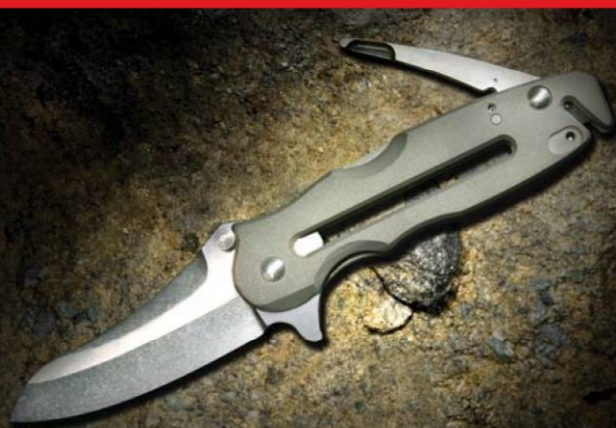

Visit www.surefire.com and search using keyword "IR" for complete list

EXPORT OF THESE PRODUCTS REQUIRES A VALID EXPORT LICENSE ISSUED BY THE U.S. DEPARTMENT OF STATE.

EDGED WEAPONS

HANDCRAFTED SUREFIRE EDGED WEAPONS ARE COLLECTOR QUALITY BUT THEY WERE MADE TO BE USED. DESIGNED AND CRAFTED BY HAND, TO MEET THE DEMANDING NEEDS OF LAW ENFORCEMENT AND THE MILITARY, THESE KNIVES THRIVE UNDER THE HARSHTEST CONDITIONS. OUR KNIVES ARE DESIGNED WITH INPUT FROM END-USERS, THEN THEY'RE BUILT BY OUR EXPERT TEAM. EVERY DESIGN ELEMENT ADDS TO OUR EDGED WEAPON'S OVERALL FORM AND FUNCTION, PRODUCING A KNIFE THAT IS RELIABLE, DURABLE, AND LOOKS AS GOOD AS IT FEELS. A SUREFIRE EDGED WEAPON BELONGS WITH THE HARDCORE PROFESSIONAL WHO APPRECIATES THE IMPORTANCE OF A RUGGED, FUNCTIONAL PIECE OF TACTICAL STEEL. IT'S A KNIFE WORTHY OF THE SUREFIRE NAME.

L.E.O.® FOLDER

The L.E.O. was designed with the needs of law enforcement in mind. The L.E.O.'s blade, made from a specialty steel renowned for its strength and edge-holding ability, has a deep drop-point for maximum safety and control when cutting away seatbelts, clothing, or harnesses. Yet it's still pointed enough to provide excellent penetration. It includes a Flex-Cuf® cutter, integral blade finger guard (also serves as flip-open lever), flathead screwdriver, and a reversible titanium pocket clip. SureFire also makes Delta blades, both folder and fixed, and the Echo fixed blade is another classic that features scalloped serrations for heavy-duty cutting.

order at: www.surefire.com/leo

NEW

THE SUREFIRE PEN

This latest addition to the rugged, ever-growing SureFire family has a lot to prove—and it delivers. It boasts a virtually indestructible aerospace-grade aluminum body that's hard anodized for toughness. It's also been appointed with a tumble-polished stainless steel tip, pocket clip, and a window breaker tailcap that's always ready for emergencies. And this retractable pen writes like a dream. The SureFire Pen is fully adjustable to accept nearly any ink cartridge, but it comes standard with a high-quality Schmidt® easyFLOW 9000 ink cartridge. Smooth writing, bold design, and—oh yeah, it breaks windows; or anything else that might get in your way.

order at: www.surefire.com/pen

WINDOW BREAKER

FAST-ATTACH[®] SOUND SUPPRESSORS

SUREFIRE FAST-ATTACH[®] SOUND SUPPRESSORS UTILIZE CUTTING-EDGE DESIGN, ADVANCED METALLURGY, AND PRECISION MANUFACTURING TO CREATE THE WORLD'S FINEST SUPPRESSORS—PERIOD. CONSISTENT, MINIMAL SHIFT FROM A WEAPON'S UNSUPPRESSED POINT-OF-IMPACT, COMBINED WITH SUPERB SOUND ATTENUATION AND SUPERIOR FLASH AND DUST SUPPRESSION—SET SUREFIRE SUPPRESSORS APART. OPERATORS USING SUREFIRE SUPPRESSORS BENEFIT FROM ITS HIGH-PERFORMANCE SOUND ATTENUATION THAT HELPS PROTECT THE HEARING OF YOU AND YOUR FELLOW OFFICERS WHILE ALSO ENHANCING COMMUNICATIONS, AND DISGUIISING YOUR POSITION IN BATTLE. THE FAST-ATTACH SYSTEM PERMITS REMOVAL OR RE-ATTACHMENT OF THE SUPPRESSOR IN SECONDS, WITH NO TOOLS AND NO NEED TO RE-ZERO IN MOST CASES, BY UTILIZING SUREFIRE ADAPTERS AS ROCK-SOLID MOUNTING PLATFORMS. ENGINEERED TO PERFORM, BUILT TO LAST, AND PROVEN IN COMBAT. SUREFIRE MAKES THE WORLD'S FINEST SOUND SUPPRESSORS.

ALL OF THESE FEATURES + COMBAT PROVEN

- Compact & Lightweight
- High-Performance Sound Attenuation
- Significant Reduction of Flash & Dust Signature
- Zero or Minimal, Consistent Point-of-Impact Shift
- Typically Improves a Weapon's Accuracy
- Extreme Durability
- Fast Attachment/Detachment
- No Permanent Weapon Modifications
- Adapters Offer Stand-Alone Functionality

SUPPRESSOR ADAPTERS

SUREFIRE SUPPRESSOR ADAPTERS SERVE TWO PURPOSES:

- 1 They act as rock-steady mounting platforms for SureFire suppressors.
- 2 They are stand-alone devices that enhance the performance of your firearm.

Our proprietary adapter design ensures precise alignment of a SureFire suppressor every time, and multiple bearing surfaces offer solid, steady support for the suppressor.

There are three types of SureFire adapters. Each offers different performance characteristics as a stand-alone device:

EN RELIABILITY = FULL-TIME USABILITY

Muzzle Brakes

Reduce recoil and muzzle rise, allowing a shooter to re-acquire a target more quickly.

Flash Hiders

Reduce a weapon's flash signature, therefore masking one's position; and they also preserve a shooter's night-adapted vision.

Compensators

Provide the best of both worlds by greatly reducing flash and muzzle rise.

SEE THE VIDEO AND ORDER AT:
WWW.SUREFIRESUPPRESSORS.COM

EXPORT OF THESE PRODUCTS REQUIRES A VALID EXPORT LICENSE ISSUED BY THE U.S. DEPARTMENT OF STATE.

The exact SureFire adapters available for your firearm depend on your weapon's caliber, make, and model. For a complete listing, visit www.surefiresuppressors.com

ACCESSORIES

A COMPLETE LINE OF ACCESSORIES HAVE BEEN DESIGNED TO OPTIMIZE YOUR SUREFIRE ILLUMINATION TOOLS. THIS IS ESPECIALLY VITAL WHEN MEETING THE NEEDS OF THOSE WHO GO IN HARM'S WAY. MAKE YOUR SUREFIRE LIGHT EVERYTHING IT CAN BE; CHOOSE GENUINE SUREFIRE ACCESSORIES.

TAILCAP SWITCHES

Customize your SureFire illumination tool with either a momentary-on/twist constant-on tailcap, or a press-momentary-on/press-further-click-on tailcap. Operate your SureFire according to the tactics that are right for you.

FILTERS, DIFFUSERS & COVERS

SureFire filters convert white light into night-vision-friendly colors, while diffusers widen beam patterns, and covers protect your light. And with the flip-up feature you can transition your light quickly and easily.

Holsters, traffic wands, Combat Rings,[™] lanyards, pistol leashes, spares carriers, and the most trustworthy lithium batteries in the world are just some of the SureFire accessories that'll ensure that you and your SureFire are operating at peak performance.

SPARES CARRIERS

SureFire spares carriers hold a spare lamp assembly and four or six spare SF lithium 123A batteries. They're made of an impact-resistant polymer and O-ring sealed for a watertight seal. Attaches to a durable nylon lanyard with dual cord-locks.

order at: www.surefire.com/accessories

Visit www.surefire.com to learn more about any SureFire product.

DURABLE LED CONVERSION HEADS

SureFire also offers LED assemblies and conversion heads that simply drop in or screw onto your SureFire incandescent lights, so you can easily upgrade your most-trusted SureFire lights with the latest, brightest, and most rugged LED technology available. SureFire utilizes only the highest-quality LEDs from the best LED manufacturers.

SureFire incorporates only superior-quality light emitting diodes (LEDs) into their handheld illumination tools and WeaponLights. Sophisticated LEDs offer substantial advantages* over incandescent bulbs including:

- ➔ Higher Lumen Output
- ➔ Longer Runtime
- ➔ Longer Service Life with no filament to burn out or break
- ➔ Virtually Immune to Failure from shock, vibration, or recoil

order at: www.surefire.com/LEDheads

* Note: Despite their many advantages, LEDs put out minimal Infrared radiation, so they're not suitable for IR uses. SureFire incandescent lights are better suited for operations requiring both Infrared and white light.

SUREFIRE BATTERIES

SureFire 123A lithium batteries have a 10-year shelf life and a higher power density and voltage than alkaline batteries. They are lighter weight and offer better cold-weather performance too. They are also engineered with built-in fault and heat protection for added safety.

⚠ WARNING:

Lithium batteries can explode or cause burns if disassembled, shorted, recharged, exposed to water, fire, or high temperatures. Do not place loose batteries in a pocket, purse, or other container containing metal objects. Do not mix with used or other battery types, or store with hazardous or combustible materials. Store in cool, dry, ventilated area. Follow applicable laws and regulations for transport and disposal.

⚠ INFERIOR IMPORTED BATTERY and COUNTERFEIT BATTERY WARNING:

There have been several incidences reported of counterfeit and/or low-quality batteries spontaneously combusting or venting, which have resulted in damage to the flashlight and in some cases property damage or personal injury. For this reason SureFire strongly recommends that you use only SureFire-brand lithium batteries (or batteries manufactured by well-known manufacturers such as Panasonic or Duracell) to guarantee safe performance. SureFire's lithium batteries are manufactured to strict quality control standards specifically for use in high-performance, high-drain devices, and contain

built-in fault/heat protection. The use of lesser-known or counterfeit brands could damage your SureFire product and may constitute a safety hazard. To ensure that you get authentic, competitively priced SureFire batteries, purchase them only from surefire.com or an authorized SureFire reseller. Use of non-SureFire-brand batteries may void your warranty. Customers are specifically cautioned not to purchase batteries from online auction websites, as these are known sources of counterfeit batteries.

THE SUREFIRE NO-HASSLE GUARANTEE

Lamps will burn out, batteries will be used up, and switches may eventually wear out.
Everything else is covered by our no-hassle guarantees:

ILLUMINATION TOOLS WARRANTY

SureFire warrants our illumination tool products to be free from defect in workmanship and materials, including any LEDs housed within, for the lifetime of the original owner. We will repair, replace, or refund your original purchase price of this product, at our discretion, if it is determined by us to be defective. Electronics, chargers, and rechargeable batteries are covered for a period of two years with proof of purchase. Normal wear and tear—including lamps burning out, batteries draining, and switches wearing out—is not covered, nor is damage resulting from abuse, neglect, battery leakage, use of other than SureFire-brand batteries or accessories, or altering this product from its original state. SureFire offers a 10-year limited warranty in any country or under any jurisdiction where specific restrictions exist on limited lifetime warranties.

SUPPRESSOR WARRANTY

SureFire, LLC will repair or replace free of charge any suppressor manufactured by SureFire, LLC for the duration of this lifetime warranty. This warranty is of unlimited duration and covers service, repair, and/or replacement of suppressors damaged during normal use and conditions. This warranty guarantees our suppressors to be free from defect in workmanship and materials. This warranty does not cover damage to the suppressor resulting in whole or in part from criminal or negligent use, improper or careless handling, unauthorized modifications, defective, improperly loaded, non-standard, non-SAAMI/NATO specification ammunition, or neglect. Any repairs to the suppressor made necessary by these factors will be invoiced to the owner. SureFire assumes no responsibility whatsoever, and will honor no claims for damages, regardless of nature, for physical injury or property damage resulting from careless and/or irresponsible handling, adjustments to the suppressor, neglect or abuse.

This expressed lifetime warranty is the only warranty on this suppressor. This has no implied warranties of merchantability or fitness for a particular purpose. There are no warranties which extend beyond the description set forth herein.

WARRANTY CLAIMS

For repair or replacement contact Customer Service at 800-828-8809 (toll free) or 714-545-9444 and obtain a Return Merchandise Authorization number (RMA#). Then package the unit carefully and return (no CODs please) to:

SureFire, LLC.
Repairs Department, RMA# _____
17680 Newhope Street, Suite B
Fountain Valley, CA 92708

SureFire will pay any reasonable shipping costs to return the unit to you.

SureFire, LLC reserves the right to correct any errors or inaccuracies contained herein, and to revoke stated offers at any time without notice. Prices, availability, specifications, and promotional offers are subject to change or cancellation at any time without notice. Weights, measures, and shipping information are approximate, and product images may appear without perfect accuracy. SureFire, LLC disclaims all warranties, whether express or implied, with respect to the accuracy or completeness of any information contained herein, to the fullest extent possible under applicable laws. Under no circumstances shall SureFire, LLC be liable for any direct, indirect, incidental, special or consequential damages that result from any information contained herein.
